How to drive even more traffic from the Google ecosystem?

Q&A Questions and answers

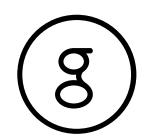

# Why is IBE optimisation important?

Direct reservations bring acquisition costs down and increase revenue. Online travel agencies (OTAs) work with 15 - 20% commission as marketing distribution platform fee. With no middle man involved the relationship is direct between the hotel and the guests.

Google Hotel Search drives traffic directly to the hotel's IBE. You still need to convince online visitors to make the buying decision by offering a smooth and secure booking experience.

The number of your prospective guests visiting your hotel's website is higher than you imagine. According to a Google hotel website study, 52% of OTA visitors will visit the hotel website directly in order to collect more information (source: <u>PhocusWire</u>, 2014).
